

2mm AR Coating Solar Glass

Lightest AR-coated Solar Glass Ever

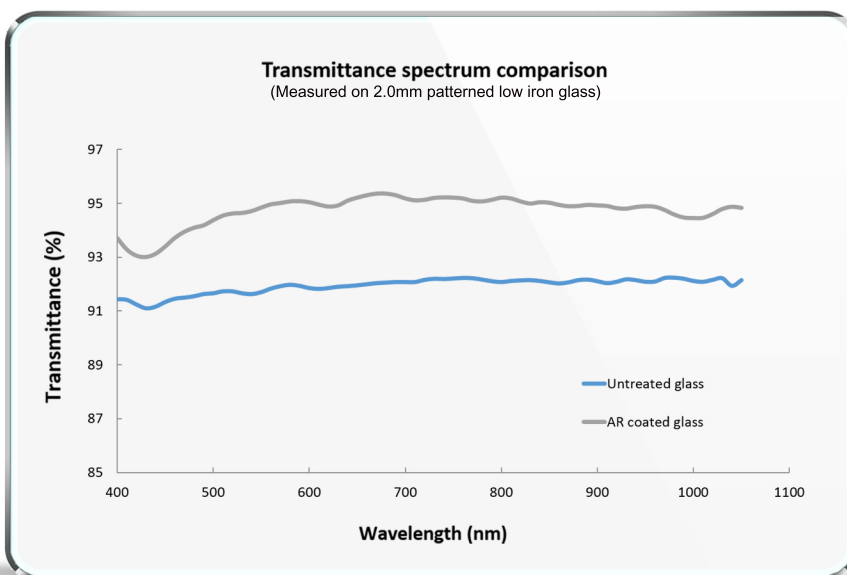

MORE Series

- Transmittance improvement above 3%.
- Easy cleaning property with uniquely formulated stain repellent nano coating.

- 40% lighter than common solar glass.
- Precisely tuned refractive index and film thickness designed for the best optical performance.
- Strong chemical bonding between glass and coating guarantees the best coating adhesion.
- State of the art nano coating technology developed since 2006.

Almaden®

Reliability test:

Test	Exp. Cond. Based On	Standard(ΔT)	Result
Damp Heat	IEC 61215-2005	<1%	Pass
Thermal Cycle	IEC 61215	<1%	Pass
Humidity Freeze	IEC 61215	<1%	Pass
UV Exposure	IEC 61215	<1%	Pass
Salt Spray	EN 1096-2	<1%	Pass
Acid Resistance	ISO 2812-1:2007	<1%	Pass
Washability Test	ISO 11998:2006	<1%	Pass

Physical properties:

Transmittance gain	$\geq 3\%$	At normal incidence with AAA light source
Hardness	>4H	
Appearance	Transparent with light blue color
